

Error: The ssh-private-key argument is empty. Maybe the secret has not been configured, or you are using a wrong secret name in your workflow file.

エラー: ssh-private-key 引数が空です。おそらく、シークレットが設定されていないか、ワークフロー ファイルで間違ったシークレット名を使用している可能性があります。

The screenshot shows a GitHub Actions workflow run named 'deploy' that failed 6 minutes ago. The workflow consists of several steps: 'Set up job' (2s), 'Run actions/checkout@v1' (3s), 'build' (12s), and 'Run webfactory/ssh-agent@v0.2.0' (1s). The final step failed with an error message: 'Error: The ssh-private-key argument is empty. Maybe the secret has not been configured, or you are using a wrong secret name in your workflow file.' The error message is highlighted in red in the original image.
